Professional Summary

Cybersecurity graduate targeting **SOC L1 Analyst** and **Entry-Level Network Engineer** roles, with hands-on experience in SOC operations, network security, CCNA-based routing and switching, vulnerability assessment, and penetration testing. Skilled in SIEM workflows, threat intelligence, incident response, log/alert triage, and security automation using Python and FastAPI. ISC2 Certified in Cybersecurity (CC), CCNA-trained, with practical experience building enterprise vulnerability management and cyber threat intelligence solutions.

Education

Government Engineering College, West Champaran

B.Tech in Computer Science and Engineering (Cyber Security), CGPA: 8.25/10

Nov 2022 – May 2026

Bihar Engineering University

Experience

CCNA Certification Training (45 Days)

Jul 2026 – Aug 2026

BIPARD Skill Park, Govt. of Bihar (WALMI Campus)

Patna

- Selected for an intensive 45-day CCNA networking program (2 Jul – 15 Aug 2026) at BIPARD Skill Park – Bihar's flagship state government skill-development institute, delivered through industry-standard labs and accredited trainers.
- Gained hands-on expertise in routing and switching, VLANs, trunking (DTP), OSPF, ACLs, NAT/DHCP, subnetting, and network troubleshooting on live Cisco hardware and Packet Tracer simulations.
- Trained under an employment-linked skilling initiative focused on job-ready, industry-recognized networking competency for entry-level Network Engineer roles.

Cybersecurity Intern – SOC / VAPT

Dec 2025 – Jan 2026

Invigo Infotech

Hybrid

- Performed security assessments across 15+ enterprise systems, identifying vulnerabilities and supporting remediation planning.
- Assisted SOC operations through alert monitoring, vulnerability validation, SIEM workflows, and incident analysis.

Offensive Cybersecurity Intern

Jun 2025 – Jul 2025

InLighnX Global Pvt Ltd

Remote

- Conducted penetration testing using Kali Linux, Burp Suite, Metasploit, and Nmap across enterprise lab environments.
- Validated vulnerabilities following MITRE ATT&CK and OWASP methodologies.

Projects

Agent-less Windows Vulnerability Scanner | *Python, FastAPI, React, PowerShell*

Repository

- Built an agent-less vulnerability assessment platform with CVE mapping, RBAC, compliance checks, and automated reporting.
- Automated evidence collection and report generation, reducing manual assessment effort by nearly 60%.

OEM Vulnerability Monitoring Tool | *Python, FastAPI, PostgreSQL, Docker*

Repository

- Developed a vulnerability intelligence platform integrating CVSS, EPSS, KEV, and OEM advisories for centralized exposure tracking.
- Automated classification, alerting, and reporting to significantly reduce manual monitoring effort.

Cyber Threat Intelligence AI System | *Python, FastAPI, React, Docker*

Repository

- Built a CTI platform for threat ingestion, IOC extraction, correlation, severity scoring, and analyst dashboards using OSINT feeds.

Technical Skills

Security: SOC Operations, Incident Response, Threat Intelligence, VAPT, Vulnerability Assessment, Risk Assessment, Network Security

Networking: TCP/IP, IPv4/IPv6, Routing, Switching, VLAN, OSPF, ACL, NAT, DHCP, DNS, Subnetting, Cisco Packet Tracer

Tools: Splunk, Wireshark, Nmap, Burp Suite, Metasploit, OWASP ZAP, Kali Linux, Volatility, Git, Docker

Programming: Python, PowerShell, SQL, JavaScript, FastAPI, React.js

Frameworks: MITRE ATT&CK, OWASP Top 10, CVSS, EPSS, CISA KEV, NIST

Certifications

ISC2 Certified in Cybersecurity (CC) | CCNA Certification Training (Cisco) | Cisco Ethical Hacker | CCNA 1, CCNA 2, CCNA 3 | Cisco Cybersecurity Essentials | Cisco Introduction to Cybersecurity | Networking Essentials | NPTEL Ethical Hacking | TryHackMe Top 1%
